

# PocketWifi Overview

## Status Bar Icons

The home screen's status bar may feature the following icons, depending on current status.

Icon	Description	
	Sprint Spark enhanced LTE network available	
	Sprint Spark enhanced LTE network connected	
	Out of service area	
	Signal strength	Battery full
	LTE connected	Battery low
	LTE disconnected	Battery charging
	3G connected	USB connected

## Turning on the hotspot

1. Slide the power key to On position
2. Once you see a lock icon on the screen, the hotspot is ready to use (the hotspot is locked down, so you will not be able to get in beyond the "lock" screen)
3. Information on screen
  - a. Upper left – shows information about connection and signal strength
  - b. Upper right – shows battery life

## Finding the Wifi Name and Password

Wifi Name and password are on a sticker on the back of the hotspot

## **Connecting your device to the hotspot**

1. Open your device's wifi settings
2. Find the hotspot's listing and select it
3. Enter the password for the hotspot

## **Waking up the display screen**

To turn the screen on, press the Lock Key

## **Turning off the hotspot**

Slide the power key to Off position

## **Charging the hotspot**

1. Plug the charger into the hotspot using the microUSB connector
2. Plug the other end of the charger into an outlet

Battery life when the hotspot is in use continually is approximately 6 hours. It will hold a charge much longer if not being actively used.
